Flat installation no multiple wires and cables

Network

If the customer has a central server then the thin client (has RJ45 port) to be connected to the central server. IT manager has to enable Thin client as a member of Domain.

Thin client will be given a User ID and password and any user in the network can paste their presentation on the folder. In this case no MS office is required since the customer will be having the MS office already installed in the server.

If the customer has proxy server (no dedicated server) each user can access their presentation from the conference room display by using **"remote desktop"** function. In this case also MS office is not required.
